

# **Astore Keymak Dragline Hose**

## **THE MANUFACTURING PROCESS**

At Astore Keymak our Dragline hoses are manufactured from compounds produced at our facility using locally sourced raw materials. This gives us significant control over the quality of the finished product.

## **KEYMAK HOSE UNIQUE FEATURE**

At Astore Keymak we are able to manufacture to a customer's colour preference and specially emboss a company name on a Dragline order. Our manufacturing facilities enable us to manufacture Dragline to any length depending on a customer's request.

## **DRAGLINE FEATURES & BENEFITS**

- Durable
- Excellent abrasion and cut resistance
- Flexible
- Ribbed outer cover surface for reduced drag resistance

## **STANDARDS & ACCREDITATIONS**

20mm 5 year dragline is manufactured to industry standards requiring a specific inner / outer diameter and mass per meter.

20mm and 25mm 10 year dragline is an SABS product manufactured to the SANS 1086 standard.

## **CHALLENGES FACING THE INDUSTRY**

The hose industry like most industries is also facing serious challenges. Some of the challenges include:

- Cheaper sub-standard imports
- Rising costs of labour
- Increase in environmental concerns and considerations

## **DEVELOPMENTS IN THE INDUSTRY**

Over the decades the industry has developed and evolved with some significant strides in the development of hoses:

- More intense quality testing methods
- Advanced manufacturing methodology that are more environmentally friendly and products that are aligned specific to applications to reduce cost.

## DRAGLINE HOSE

Internal Diameter (mm)	20 (5 Year)	20 (10 Year)	25 (10 Year)
Pressure (kPa)			
Working	600	1200	1000
Burst	2400	4000	3800
