

Astore Keymak is the recognized leader in the Thermoplastic sector in Southern Africa.

We have the most extensive range of compression fittings and saddles, catering for various market segments.

Stock is available from our huge branch network, which is strategically around the country.

Unidelta Compression Fittings

This range is the Flagship on the company. It has a proven track record for over 40 years. The key sector is Civils, mining and high-end plumbing markets. The entire range is PN16 rated (16MM – 110MM), with vast configurations. The fittings are compliant and accredited with SANS 14236:2003 certification.

Connecto Compression Fittings

Our Range of Connecto compression fittings have been designed by a company that has been in the irrigation business for more than 40 years. The fittings are compliant and accredited with SANS 14236:2003 certification. The fittings are PN16 rated (16MM – 63MM)

AK IRRI Compression Fittings

We have been inundated with requests for a, “Budget range” compression fitting, and recently introduced our branded range AK IRRI . The range is rated PN16 (16MM- 63MM)

Saddles

We have an extensive range of Clamp saddles, which are an ideal solution for branching from existing pipelines for water and irrigation.
